

BANDSAW SETTERS

DINO BANDSAW SETTER

The Dino Bandsaw Setter makes the perfect companion to DinaSaw's bandsaw sharpener, allowing you to fully optimise the performance of your bandsaw blades either in the field or workshop.

DinaSaw's patented Bandsaw Setter is compact, fast and accurate. Weighing less than 10kg and with a speed of up to 350 teeth per minute, the DinoSaw Setter makes setting a breeze and can accurately reset your blades in less than two minutes.

The machine can cope with blades up to 55mm (2 1/8") wide and can set raker style teeth between 0 and 28mm (1 1/8") in a single pass. No need to set both sides individually – just fit the blade and turn the handle.
