

CYCLONE Fine Grit

Cyclone Fine grit grinding wheels use a unique blend of CBN and ABN particles specifically designed for DinaSaw, that makes use of the best properties of both materials.

High quality CNC machined for perfect balance and concentricity, the Cyclone grinding wheels feature a unique design that forces cool air onto the grinding surface reducing heat and tooth burning, giving it an extremely long working life with no need to dress and wheel shape never changing.

PROUDLY MANUFACTURED IN AUSTRALIA

▶ CUTTING EDGE SHARPENING EQUIPMENT

THE FEATURES

- > Unique blend of CBN and ABN particles for hardened steel chains
- > Fine Grit for a smooth, cleaner finish
- > High thermal stability, with heat treated particles for increased bond retention
- > Purpose built for dry grinding
- > CNC machined for absolute accuracy
- > Long working life with no need to dress
- > Durable nickel coating
- > Unique design keeps grinding surface cool, reducing tooth burning
- > Sizes to suit all popular grinders

THE BENEFITS

- Outlasts standard wheels many times over.
- Steel blank will not fracture.
- Wheel never needs to be reshaped.
- No maintenance required.
